Please amend claims 1, 10, 13 and 14 as follows:

1. (Currently Amended) A method for submitting a document service request from a mobile device to a document processing device coupled to a first network and being adapted to communicate with one or more servers coupled to a second network, comprising:

establishing simultaneously, from the mobile device, a first connection and a second connection with the document processing device;

specifying, at the mobile device, a document service request that includes a document identifier identifying a document in a first document format and its location on the second network;

submitting, from the mobile device over the first connection with the document processing device, the document service request together with a device identifier to an output server coupled to the second network;

receiving, at the mobile device over the first connection with the document processing device, the document in a second format from the output server; the second format of the document being an input format of the document processing device; and

resending, from the mobile device over the second connection with the document processing device, the document received from the output server in the second format to the document processing device for performing a specified document service thereon; and

wherein the first connection and the second connection are separate connections.

10. (Currently Amended) A method for submitting a document service request from a mobile device to a document processing device coupled to a first network and being adapted to communicate with one or more servers coupled to a second network, comprising:

establishing simultaneously, from the mobile device, a first connection and a second connection with the document processing device;

specifying, at the mobile device, a document scan request that identifies a document service to be applied to a hardcopy document input to the document processing device;

submitting, from the mobile device over the first connection, the document scan request;  
receiving, at the mobile device over the first connection, a scanned document from the document processing device; and

resending to a file server coupled to the second network, at the mobile device over the second connection, the scanned document received from the document processing device together with a location for storing the scanned document on the file server; and

  - specifying, at the mobile device, a document service request that includes a document identifier identifying a document in a first document format and its location on the second network;
  - submitting, from the mobile device over the first connection with the document processing device, the document service request together with a device identifier to an output server coupled to the second network;
  - receiving, at the mobile device over the first connection with the document processing device, the document in a second format from the output server; the second format of the document being an input format of the document processing device; and

resending, from the mobile device over the second connection with the document processing device, the document received from the output server in the second format to the document processing device for performing a specified document service thereon; and wherein the first connection and the second connection are separate connections.

14. (Currently Amended) A method for controlling a plurality of document service requests at a mobile device to be carried out at a document processing device, comprising:

establishing simultaneously, from the mobile device, a first connection and a second connection with the document processing device;

transmitting from the second connection the job ticket from the mobile device to the document processing device upon receipt of input instructing the at least one of the plurality of document service requests to be carried out at the document processing device;

wherein the document processing device is adapted (a) to perform all document service requests specified in the job ticket or (b) to forward processed document result data and the job ticket to another document processing device to perform uncompleted ones of the document service requests specified in the job ticket; and
